

## DNC Seminar

### **” RETINAL VASCULAR DISEASES. FROM BASIC RESEARCH TO CLINICAL INTERVENTION”**

Professor, dr. med. Christian Aalkjaer<sup>1</sup> & Professor, dr. med. Toke Bek<sup>2</sup>

<sup>1</sup> Dept. of Physiology, Aarhus University

<sup>2</sup> Dept. of Ophthalmology, Aarhus University Hospital

**Wednesday 8<sup>th</sup> of September  
14.30-15.30**

Palle Juul-Jensen Auditorium,  
Building 10G, Århus Sygehus, NBG

#### ***SYNOPSIS:***

The speakers will present basal physiological techniques for studying tone regulation in blood vessels in general, especially related to the brain and the retina, including frontier research at Aarhus University within this field. Subsequently, it will be demonstrated how the retina is specially suited for studying blood vessels in vivo, and it will be shown how the results of the presented basic research has been translated into clinical intervention studies of vision threatening retinal diseases.

**ALL ARE WELCOME**

**DNC offers refreshments afterwards**
